

Content Library

Content Sharing

- Uniquely flexible content storage
- Off-line content on mobile devices
- Share your content with granular permissions down to the file level
- Versioning, check-in/check-out & recycle bin

Presentations & Consent

- Store and manage session presentations
- Allow speakers to update consent
- Preview slide presentations, delete, redact and watermark presentations

eDoc (MS Word & Excel)

- Create sophisticated Word documents with your event data embedded
- No manual event data copy/paste

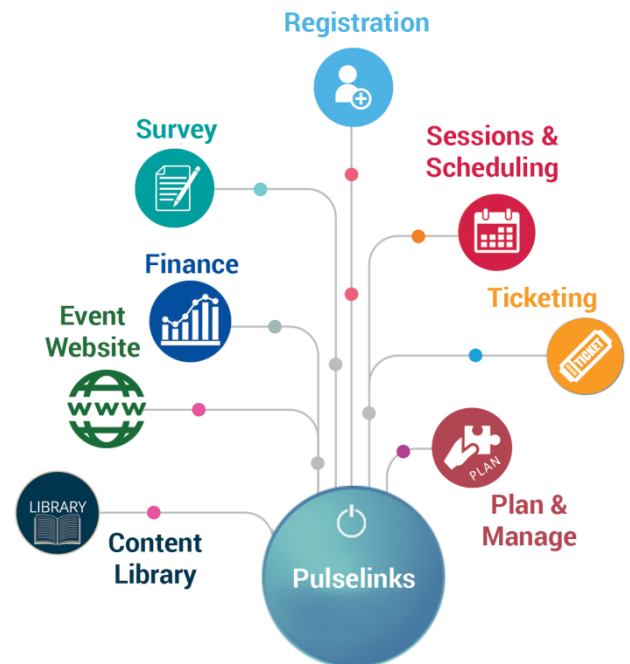

The Pulselinks platform provides a number of unique & exceptional capabilities to manage and use your event related information and content to the max.

Content Storage & Sharing: Our content library provides advanced & flexible content storage and sharing capabilities for brochures, documents, presentations & other files.

Presentations & Consent: Obtain and track consent from speakers on-line, enable upload of presentations, send reminder emails and more. Speakers can preview their PowerPoint presentation, delete slides that they don't want to publish and generate a water marked pdf for sharing with event participants. All done in a simple & intuitive manner.

eDoc Suite: Our powerful Word & Excel document generation tools will leave you wondering how you managed so far.

Information on Demand

Leverage your information

- ✓ Publish files from the content library to attendees, speakers and others
- ✓ Collaborate with Agencies for managing your event
- ✓ Use the event data not only in system reports but in MS Word and Excel. When the information changes, your files show the new data
- ✓ Instantaneous update for urgent changes

Simplify & reduce your workload

- ✓ Generate Welcome letters & Itineraries using Word where you are in control and don't need any technical skills
- ✓ Keep a set of standard excel templates for different types of analysis or distribution
- ✓ Need all your event related files off-line on an iPad when travelling or at the congress centre? Use the Pulselinks mobile app

Content Library

All your files stored in one shared repository combined with the optional eDoc modules for automated updates linked to your event data put you in control of your content and reduce your workload dramatically.

Information accuracy is increased by avoiding manual duplication of information in documents and having a flexible shared repository facilitates file sharing between internal staff and supporting agencies in a timely manner.

The eDoc suite also provides functionality for generating personalised documents for participants including the event schedule and travel details.
